OEHSA Example 1: Initial Data Input

[1] Open the OEHSA you are working on (it will already have a DOEHRS ID). Open Each Tile to add data in. In the example, some tiles are closed and others opened.

- The Survey begins as In Progress.
- The Start date/time is auto populated and can be changed to reflect actual time began.
- Completion data should reflect the time Reconnaissance ended.

[2] Re-opening Tile 2 (Survey Background) will display standard OEHSA text as well 4 important overview questions.

Population the fields as observed.

An Attachment in Tile 1 should always be the hard copy OEHSA.
