GREEN PROCUREMENT TRAINING

The training covers all the elements of buying green, such as recycled-content, biobased, and energy efficient products. We offer separate sessions – one for purchase card holders and one for specification writers/procurement personnel. We also display examples of green products, and provide hands-on exercises to help you green your purchases and your contracts!

GREEN PROCUREMENT PROGRAM PLAN DEVELOPMENT

A Green Procurement (GP) plan will facilitate implementation of your GP program. We will develop a comprehensive plan that includes regulatory drivers, responsibilities, and implementation procedures, and provides recommendations for a fully implemented program specific to your facility. We also provide sample contract language that incorporates GP into common installation services, and SOP's for the key players.

GREEN PROCUREMENT PROGRAM REVIEWS

Following implementation, a GP program review will determine where the strengths and weakness are in your program, and help you move forward. The review involves all the key activities (contracting, purchase card program, engineering, and mission elements), and provides recommendations to foster continual improvement.
