BED BUGS ARE COMING! AND THIS HITCHHIKER WANTS YOUR BLOOD!

Bed bugs aren't content with their current digs. Sure their hotel bed is nice, but why wait for food to come to them when they can go home with you!

It's hard to get rid of bed bugs once they move in. This super-bug is resistant to many pesticides!

If you think you've visited an infested location:

• Dry all your clothes on high heat for 30 minutes as soon as you get home to kill any unwanted hitchhikers.
• Treat your empty luggage by sealing it in a black trash bag and leaving it in the sun for a day.

Check out this link for quick and easy ways to not bring unwanted traveling companions home from your next vacation!
